Cultural Land Management Services

Commercial Cultural Burning	Site Assessment & Risk Management Plans
Cultural Tree Planting to Country Type	Asset & Property Protection
Cultural Ecological Restoration	Endangered Species Landscape Restoration
Fire & Water Assessment	Waterway Management & Restoration
Other (Please Specify)	

At any point, will your project require:

QLD Blue Cards		WWCC	
----------------	--	------	--

Please tell us more about your Project, add as much detail as possible

Cultural Land Management Questionnaire

If your project requires the application of Cultural Fire, please fill out the following questions as accurately as you can to allow us to have a better understanding of the property prior to a site assessment.

All our burns are carefully planned, but factors such as weed density, condition of soil, build up of biomass as well as the season will dictate the speed and intensity of the burn.

The area to be burnt may require preparation before commencement. Sensitive areas such as water tanks, water lines, pumps, pools, ponds, fences, solar arrays, building, stored materials, road verges, fuel stores (on site petrol or diesel) etc. will need to be noted.

On inspection of your property our team will give you further information and feedback on the necessary requirements to achieve your goals.

We look forwards to working with you and fixing Country.

Name		Site Address	
GPS/DP LOT ID		State	
Date		Property Size	

Please provide as much information that you have available to help us understand your property better. Please attach any further information such as:

- Topographic Maps / Contour Maps
- Fauna & flora lists
- Land Management Plans
- Fire Safety Assessments
- Areas of Cultural Significance or Heritage

1. The Soil Type: *(this allows us to identify the natural zoning the property sits within)*

The present surface species may not represent the original bio-region, this information helps with the timing of fire application.

- a. Clay
- b. Clay Loam
- c. Sandy
- d. Sandy Loam
- e. Silty
- f. Peaty
- g. Chalky
- h. Rocky
- Other / description:

2. The Forest Type: (Whats and oldest known tree species present?)

This helps us identify the weather zone and type of country for the property/area

- a.
- b.
- c.
- d.

3. The Grass Type(s) (if known), this helps us to identify the type of fire to apply.

The native grasses present, provide the correct smoke for the native species of trees to develop, fertilise and seed correctly

- a.
- b.
- c.

4. Local fauna Types: What animals do you have both native and 'non-native'?

The animals on the property have a specific relationship to the flora. Species identification allows for endangered and protected species habitat to be planned out carefully.

- a. Koala Other: Other:
- b. Wallaby
- c. Kangaroo
- d. Possum brush/ring tail
- e. Bandicoot
- f. Sugar gliders
- g. Fruit bats
- h. Bowerbirds
- i. Brush turkey
- j. Bell minors

5. Invasive Weed Species: What invasive and noxious weed plant types are on the property?

- a. Lantana Other:
- b. Crofton weed
- c. Mist flower
- d. Broadleaf paspalum
- e. Setaria Grass

6. Topography: What's the terrain type?

This will help us prepare and bring the correct equipment for the job

- a. Hills Other:
- b. Plains
- c. Swamp
- d. Coastal
- e. Hinterland
- f. Rainforest

7. Size of proposed area for proposed burning.

- a. M² or Acres

8. Has the property had fire applied to it before? Such as Back Burning?

- a. yes Please
- b. No Describe

9. Has the property and or proposed area been cultivated before: (potential hazardous reactive chemicals in soil)

- a. yes Please
- b. No Describe

10. Does the proposed land areas have any of the following

- a. Water Tanks Other:
- b. Irrigation Lines or System
- c. Water pumps
- d. Pools / Ponds or Fences
- e. Solar Arrays
- f. Road Verges
- g. Building or Stored Materials

11. Please provide any further information you feel is relevant to the site, project or burning activities
